HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

EXAMINER'S COMMENT

Application and Claims Status

1. Claims 1-7 are currently pending and are allowable.

Priority

- 2. Receipt is acknowledged of papers, i.e. Japanese Patent Application No. 2003-408376, filed December 08, 2003, submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.
- 3. Additionally, this instant application is a 371 of PCT/JP04/18533 filed on 12/07/2004, and as a result this instant application has the effective filing date of 12/07/2004.

Information Disclosure Statement

4. The information disclosure statement (IDS) filed on 10/14/2005 has been reviewed, and the references that have been considered are initialed as recorded in PTO-1449 form.

Drawings

5. Figure 8 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. Here, the instant specification discloses that figure 8 is shown a circuit arrangement of a conventional display drive for an LCD (see specification pg. 2, 1st full paragraph; pg. 14, 12th full paragraph). See MPEP § 608.02(g). Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement

Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

6. The abstract of the disclosure is objected to because the abstract exceed 150 words in length. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and *generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words*. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc. Correction is required. See MPEP § 608.01(b).

Claim Objections

7. Claim 4 is objected to because of the following informalities: The phrases of "high-voltage buffer circuit" and "low-voltage buffer circuit" are brackets, and thus it is unclear if these limitations are further defining the claimed 'one of said multiple buffer circuits' or an additional structural limitation. It is suggested that applicant replace a) 'wherein one of said multiple buffer circuits (high-voltage buffer circuit) includes' with "wherein one of said multiple buffer circuits comprises a high-voltage buffer circuit that includes"; and b) 'wherein another one of said

Art Unit: 2629

multiple buffer circuits (low-voltage buffer circuit) includes' with "wherein another one of said multiple buffer circuits comprises a low-voltage buffer circuit that includes" for clarity.

Appropriate correction is required.

REASONS FOR ALLOWANCE

8. The following is an examiner's statement of reasons for allowance:

The instant claims 1-7 are allowable for the reason that the cited prior arts do not teach or fairly suggest the presently claimed apparatuses and method of making the apparatus with the structural features combination of 'a resistive voltage-dividing circuit for dividing a display reference voltage using resistors to generate multiple bias voltages' and 'multiple buffer circuits for respectively converting said multiple bias voltages into output voltages through impedance conversion of said bias voltages' wherein one to the 'multiple buffer circuits' includes a) 'a first output circuit receiving the bias voltage supplied to said buffer circuit and the output voltage of said buffer circuit, and having enhanced drive capability of providing output current to bring up said output voltage'; b) 'a first output switch for allowing said first output circuit to output its voltage'; c) 'a second output circuit receiving the bias voltage supplied to said buffer circuit and the output voltage of said buffer circuit, and having enhanced drive capability of providing output current for bringing down said output voltage'; d) 'a second output switch for allowing said second output circuit to output its voltage'; and e) 'a voltage comparator for comparing the bias voltage supplied to said buffer circuit with the detection voltage detected at a node connected to the output end of said buffer circuit, said voltage comparator adapted to switch between said first and second output switches in accord with the comparison'.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to MY-CHAU T. TRAN whose telephone number is (571)272-0810. The examiner can normally be reached on Monday: 8:00-2:30; Tuesday-Thursday: 7:30-5:00; Friday: 8:00-3:30.
